ROBOTX

TASK 1

2

1

stelle eine neue Variable

Schritt 1: Klicke auf den orangefarbenen Punkt mit der Bezeichnung „Variablen“

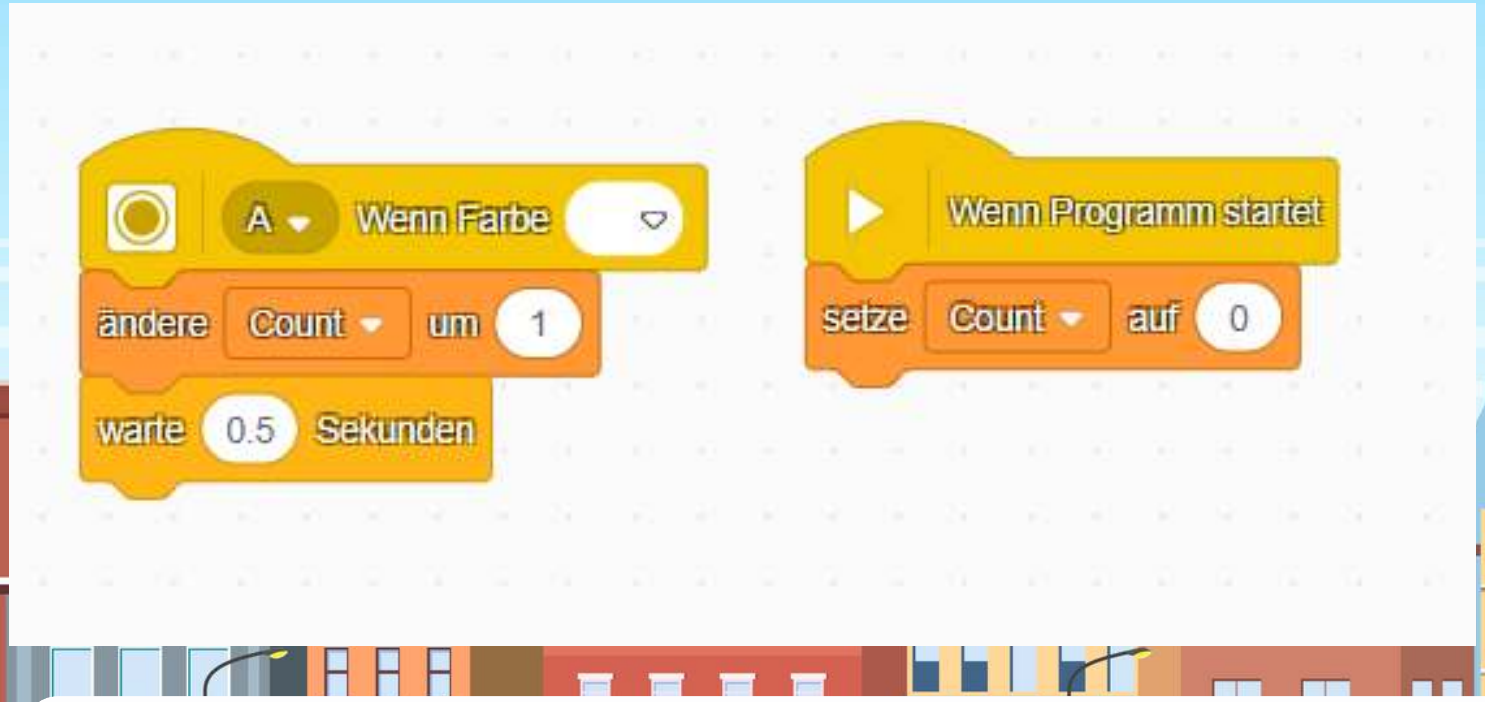

Schritt 2: Klicke auf „Variable erstellen“

Schritt 3: Nenne deine Variable „Count“

Variablen sind wie digitale Behälter oder „Zauberkästen“, in denen Informationen gespeichert werden, an die sich dein Programm erinnern und die es später nutzen kann

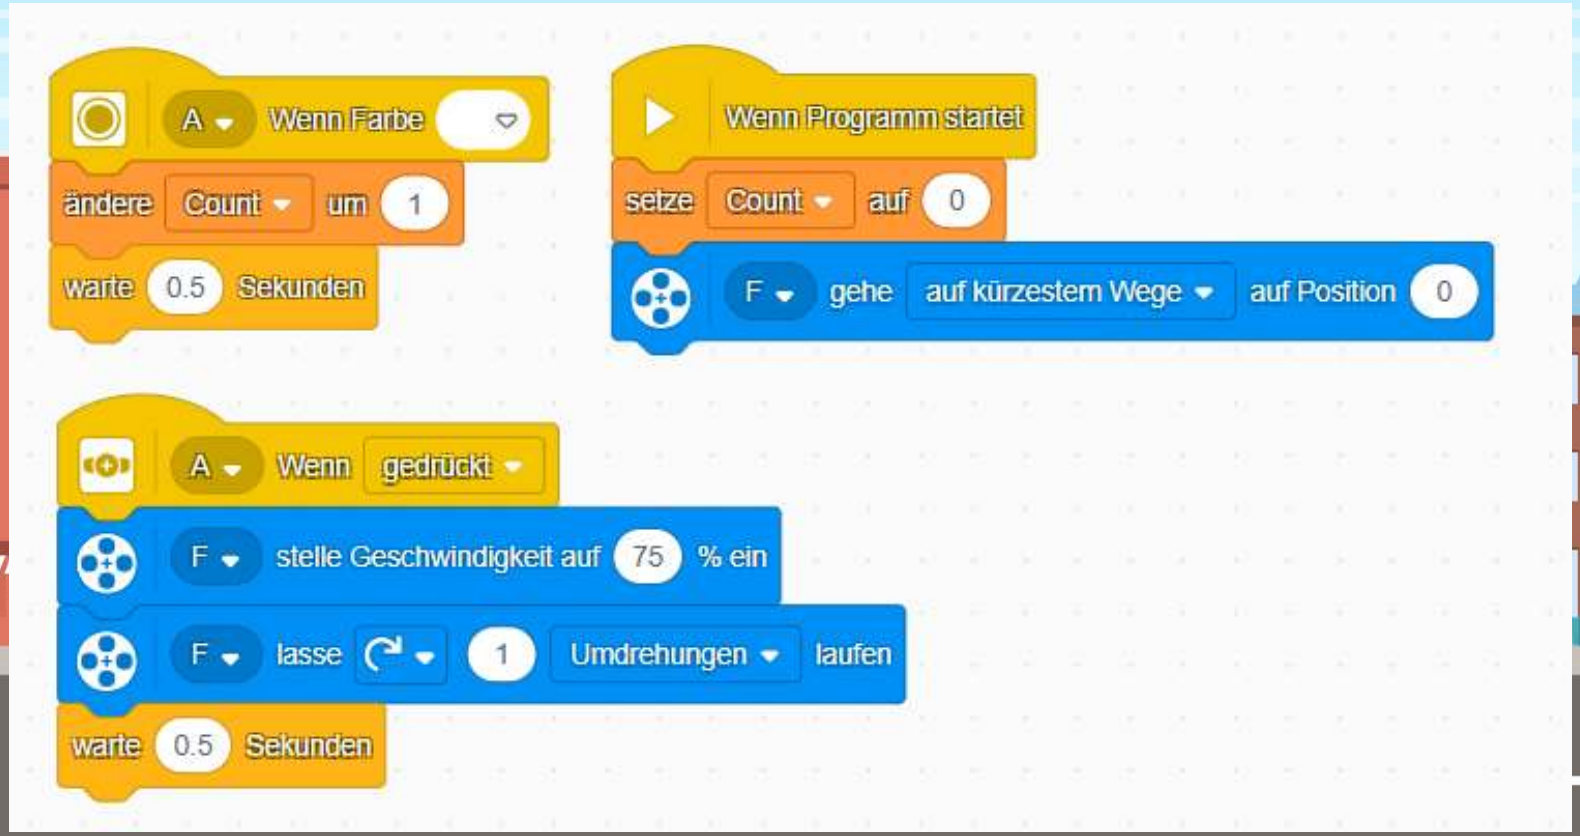

TASK 1

Dieser Code zählt, wie viele Punkte („Körbe“) du erzielst. Der Sensor erkennt, wenn der weiße Ball an ihm vorbeifliegt, und erhöht die Variable „count“ um 1.

TASK 2

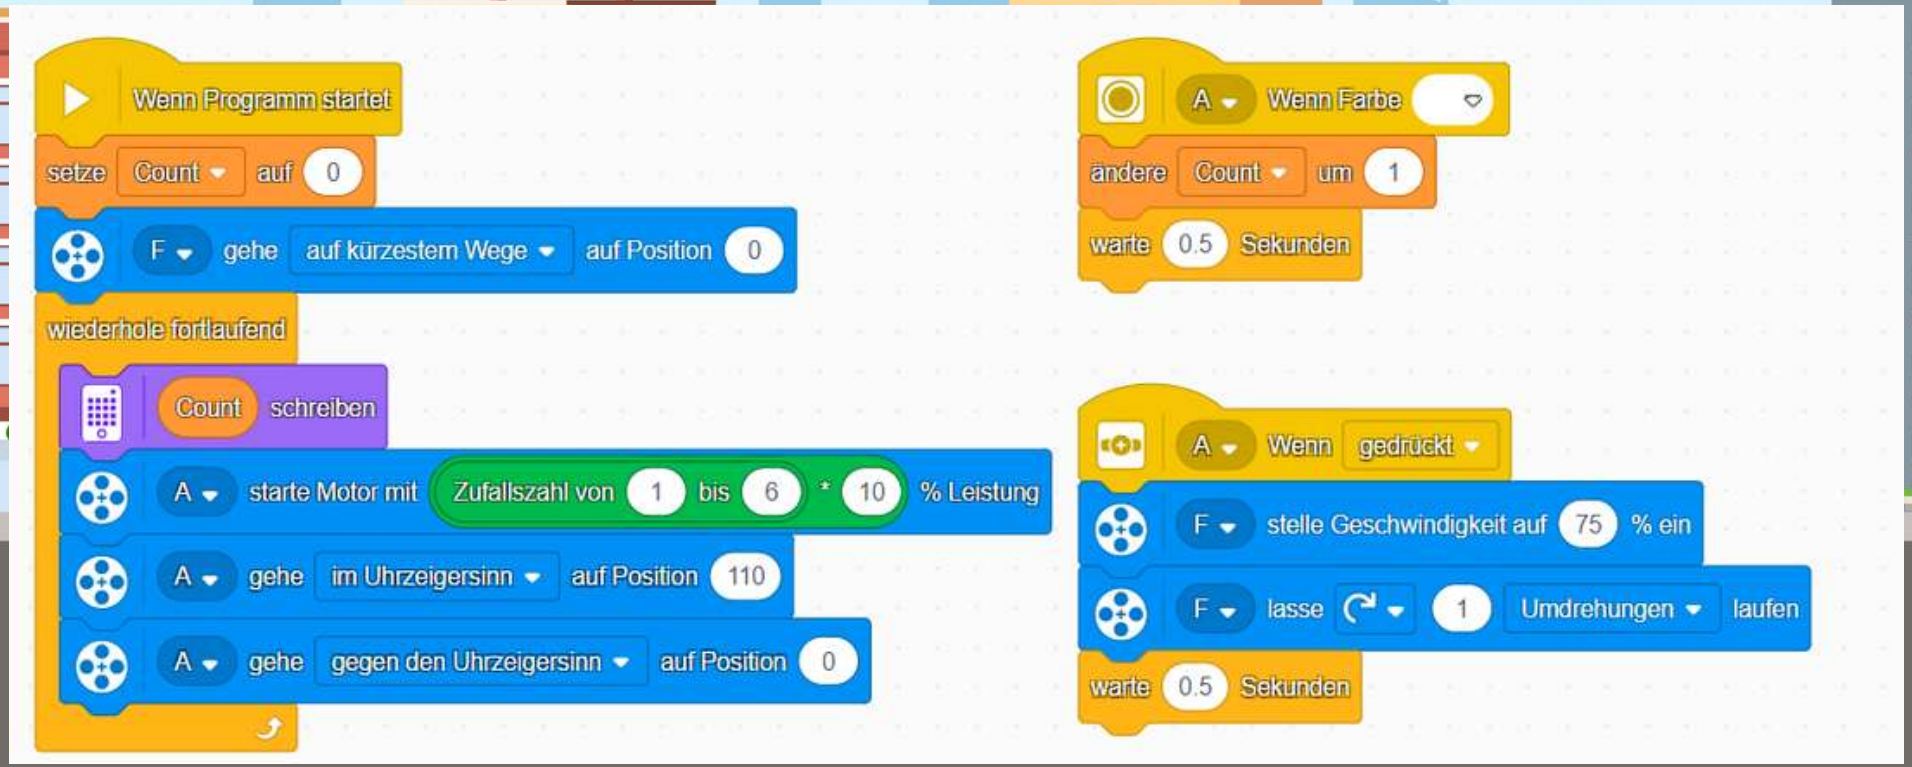

Mit diesem Code kannst du den Ball in Richtung Korb werfen

TASK 3

Im letzten Abschnitt des Codes bewegt sich der Korb mit einer Geschwindigkeit von 10 bis 60 Prozent der maximalen Motordrehzahl von rechts nach links
